⬢ INTERNSHIPS AND PROJECTS

Internships	**QSpiders** (Duration January 2024 - December 2024) As a Student Trainee I got the Hands on experience about How Java Language works and how websites are built using java as a primary language . Skills used - Java,Javascript,Java Servlets,Java Mail,Java Multithreading,Java Developer,Java Developer Trainee,Spring Boot,Hibernate Framework,JDBC,JSP Servlets,Core Java Programming,Programming **Techtice** (Duration May 2023 - October 2023) During my studies, I had the opportunity to dive into Full Stack Web Development and learn how websites are built from start to finish. I gained hands-on experience in both front-end and back-end development, which gave me a solid understanding of how everything connects. On the front-end, I worked with HTML, CSS, and JavaScript to create responsive, user-friendly interfaces. On the back-end, I used PHP to develop dynamic, data-driven websites that ensure smooth interaction between the user-facing and server-side elements. This experience helped me see the bigger picture of web development and gave me the skills to build complete web applications from the ground up. Skills used - Frontend Web Development,Frontend Web Developer,HTML,CSS,Javascript,Bootstrap,Bootstrap Framework,Icon Fonts,PHP,PHP Development,PHP Developer,PHP Developer Intern,Phpmyadmin,Xampp,Database Management

Projects	**ATM Machine** (Duration October 2024 - November 2024) This is an ATM Simulator built as a desktop application using Java, Swing, and MySQL! This system includes essential banking features to offer a realistic and interactive user experience: ? Deposit ? Withdrawal ? Fast Cash ? Balance Enquiry ? PIN Change ? Mini Statement This project provided hands-on experience in database integration, GUI design, and backend development with Java. Skills used - Java,Swing,Swing Applet,MySQL,Core Java Programming,Backend Operations,Database Management System
	Personal Virtual Assistant (Duration October 2024 - November 2024) This is Siona, a virtual assistant I developed using HTML, CSS, JavaScript, and Speech Recognition technology. ?? Siona can respond to voice commands, answer questions, and perform tasks like opening websites or fetching information ? all with a personalized touch! Building Siona was both a challenging and rewarding journey, allowing me to strengthen my front-end development skills and explore the power of voice technology. ? Skills used - Frontend Development,Frontend Web Development,HTML,HTML And CSS Developer,CSS,Javascript,Speech Recognition,Real Time Analysis,Real Time Operating System,Speaking Skills,Speaker,Virtual Assistant
	CHAT-GPT Clone (Duration September 2024 - October 2024) This is an AI-powered virtual assistant built using a combination of speech recognition and text-to-speech technologies. ? This project allows users to interact with the AI by voice and text, providing seamless responses to queries in real time. ??? Some key features include: ? Speech recognition for real-time input. ? Speech synthesis to read out the AI?s responses. ? Interactive chat interface for text-based communication. ? AI integration for intelligent and contextual answers. Skills used - HTML,CSS,Javascript,Javascript Programmer,API,Artificial Intelligence,Gemini,Speech Recognition,Speech Language Pathologist,Speech syn,Speech And Language Therapist,Speech Writing
	Student Management System (Duration July 2024 - October 2024) I?ve developed a basic Student Management System using HTML, CSS, and PHP! ?? This system focuses on essential functionalities like adding new students, updating their details, and promoting their class. It?s a great example of how simple tools can create effective solutions! ?? ? Key Features: Add new student records Update existing student information Promote students to the next class ? ? Tech Stack: HTML, CSS, PHP Skills used - HTML,HTML And CSS Developer,HTML Development,HTML Developer,CSS,Javascript,PHP,Phpmyadmin,PHP And Web Developer,PHP And Website Developer
	NYAYA - Advocate Hiring Platform (Duration April 2024 - June 2024) This project is an innovative Advocate Hiring Platform designed to simplify the process of hiring legal professionals. The platform allows users to easily find and hire a lawyer based on their specific requirements, enabling them to efficiently manage legal tasks that would typically take significant time and effort. By streamlining the hiring process, the platform offers a more accessible and user-friendly alternative to traditional methods of securing legal representation. The project is developed using HTML, CSS, and JavaScript for the front-end, with PHP utilized for the back-end, ensuring a seamless and responsive user experience. Skills used - HTML,CSS,CSS And Javascript,CSS Programmer,HTML and CSS,Javascript,Javascript Programmer,Bootstrap,PHP,Phpmyadmin,Xampp,Backend Operations,Database Management

✳ SKILLS AND ACHIEVEMENTS

Skills	Python,Gaming
Language	English (Both), Hindi (Spoken), Oriya (Both)
Test score	JEE Mains (189565)
